

**Discover the smart technology  
that is LED lighting...**

New to Bellingin Solar is a complete range of LED business lighting solutions.

From the Philips MASTER LED range for all general lighting applications in the hospitality and retail industries through to outdoor LED lighting solutions including street lighting with solar options when wiring is not economical or practical.

For industrial applications we have a range of LED and Plasma Highbays where both the quantity and quality of light are important and for indoor and retail applications we now carry a range of LED Shopfitters.

The benefits of using LED lighting are multiple and include long life, great light quality and lower energy consumption which of course means lower electricity bills.

### **...act now and save!**

**With energy prices projected to increase by more than 64% by 2013, improving energy efficiency will take the pressure off your bottom line and the environment.**

#### **Small Business**

If you employ up to ten people or spend up to \$20,000 on electricity each year you may be eligible for a subsidy of up to \$5,000 towards the cost of installing energy efficient improvements.

#### **Medium to Large Business**

If your organisation uses between 160MWh and about 10GWh per year, you can access an audit for as little as 20 to 50 per cent of the usual cost and you may be eligible for up to \$20,000 towards the cost of installing leading edge technology.

#### **Large Business - Energy Savings Scheme**

The ESS is designed to increase opportunities to improve energy efficiency by rewarding companies who undertake eligible projects that either reduce electricity consumption or improve the efficiency of energy use.
